

AVIAN COLIBACILLOSIS VACCINE, INACTIVATED, WATER IN OIL EMULSION

Nobilis® E. COLI inac

374495 R1

NOT FOR HUMAN USE - FOR ANIMAL TREATMENT ONLY

Warning: To be sold by retail on the prescription of a 'Veterinary Doctor' only

DESCRIPTION

An inactivated vaccine, containing 100 mcg F11-antigen and 100 mcg FT-antigen of Escherichia coli per dose in a water-in-oil emulsion. The vaccine contains 0,05% w/v formaldehyde as a preservative.

INDICATION

Passive immunization against colibacillosis in broiler chickens by vaccination of broiler breeders.

Antibodies against the antigens contained in the vaccine, are transferred to the progeny of the vaccinated hens via the eggs. These antibodies help to protect the embryos and the broiler chickens against the effects of colibacillosis.

VACCINATION PROGRAMME

Broiler breeder hens are to be vaccinated at 6-12 weeks of age. Vaccination is repeated at 14-18 weeks of age. The interval between vaccinations has to be at least 6 weeks.

DOSAGE AND ADMINISTRATION

Inject 0.5 ml per bird subcutaneously into the back of the neck or intramuscularly into the breast muscle.

VACCINATION REACTION

In healthy birds no systemic reaction to vaccination, carried out aseptically, will be observed. For some weeks after vaccination a slight swelling may be felt at the site of vaccination. Local tissue reactions may occur.

NOTES

- Only vaccinate healthy birds.
- Before using the vaccine allow it to reach room temperature (15-25°C).
- Shake the bottle prior to and intermittently during application.
- Use sterile syringe and needle.
- Opened bottles should be used within 10 hours.
- Should a vaccinator by accident inject himself or a bystander, a local reaction may occur. It is recommended that the advice of a doctor should be sought taking care to inform him that the vaccine is a water-in-oil emulsion.

WITHDRAWAL PERIOD

- meat: none
- eggs: none

SHELF LIFE: 24 months when stored at 2 to 8 °C

STORAGE

Store at temperature of 2-8°C and avoid freezing.
